

Case History

Truckmount response for nursery

Two inches of standing water were removed from a children's nursery following a flood by utilising the Truckmount Carpet Cleaning and Water Extraction system.

Following removal of the standing water, carpets were uplifted, a drying regime installed and the building was returned to "Business as Normal" in just 2 weeks by Rainbow's Bridgwater branch.

The work also included cleaning of the carpets and PAT testing of all electrical goods in the nursery, and following this restoration and recommendation further children's nurseries were sanitised in the Somerset area following a bout of the winter vomiting bug.

Alison Jeffrey of Cheekie Monkeys Day Nursery in Ilminster commented: "Rainbow International helped us out at a time of crisis for our business. They dealt with our problem with speed and professionalism and the finished job was done to a very high standard".
